

# CSS

## Class selectors

### example

```
• red-hair {  
  color: red;  
}
```

```
<h2 class="red-hair">  
  beautiful  
</h2>
```

## Id selectors

Ex:

index.html

```
<h2 id="main"> Red </h2>
```

style.css

```
#main {  
  color: Red;  
}
```

Note;

ID vs class

→ Very unique

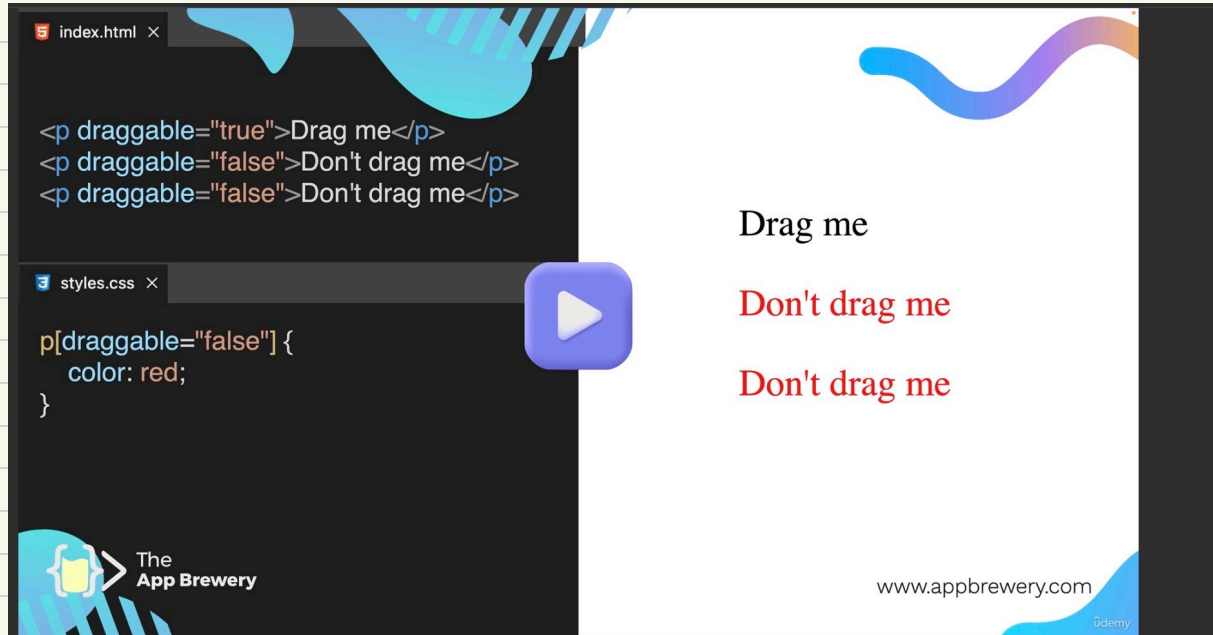

→ one element

\* not unique

\* many elements

# Attribute selectors

Ex

Note: \* of  
text-align: center;  
}

// This "\*" means  
it will make changes  
to all the elements
